PROFESSIONAL SUMMARY

Entry-level Full Stack Developer who independently designed, built, and deployed a real-world multi-tenant SaaS application using React, Node.js, Express.js, and MySQL. Hands-on experience with JWT authentication, role-based access control, REST APIs, database transactions, scheduled background jobs, bKash payment integration, and Docker-based deployment. Seeking a Junior Full Stack Developer role to contribute to scalable and maintainable web applications.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, React Router, Tailwind CSS, Bootstrap, Zustand

Backend: Node.js, Express.js, REST APIs

Database: MySQL, Sequelize, MongoDB, Mongoose

Authentication & Authorization: JWT, Role-Based Access Control (RBAC)

Tools & DevOps: Git, GitHub, Docker, Render, Figma, Pixso

Concepts: Multi-Tenant SaaS Architecture, Database Design, Transactions, Cron Jobs, API Integration, Responsive Web Design

FEATURED PROJECT

Smart Mess Management System | Solo Full Stack Project

Live: <https://mess-1-qbui.onrender.com>

React, Node.js, Express.js, MySQL, Sequelize, JWT, Docker, Render

A multi-tenant SaaS platform that enables multiple independent messes (boarding groups) to manage members, meals, expenses, deposits, and monthly accounts through one centralized web application.

- Implemented multi-tenant architecture using tenantId-based data isolation, so each mess accesses only its own data on a shared platform.
- Secured the application with JWT authentication, authorization, and role-based access control (RBAC).
- Developed modules for members, meal requests, meal entries, meal sessions, expenses, deposits, notifications, dashboards, and automated monthly meal/account calculations.
- Built REST APIs using a service/repository/controller architecture with Sequelize and MySQL, applying database transactions to maintain data consistency.
- Integrated bKash payment gateway (sandbox) for subscription payments and scheduled background tasks using cron jobs.
- Containerized the application with Docker and deployed it on Render, serving client and server as a single application.

EDUCATION

Diploma in Computer Technology

Tangail Polytechnic Institute, Bangladesh

Expected Graduation: 2026 | 8th Semester (Ongoing)

LANGUAGES

Bangla: Native

English: Basic (can understand basic written and technical English)
